Gunnar Schjelderupsvei
Oslo, Norway

SKILLS

- RAG platforms, CrewAI agents and LLM APIs
- Python, FastAPI and REST integrations
- React, TypeScript and frontend interfaces
- Docker, Kubernetes and GCP
- Technical design, testing and documentation
- Agile delivery and cross-functional collaboration

LANGUAGES

- English (Fluent)
- Norwegian (Fluent)
- Spanish (Mother tongue)

EDUCATION

2014-2017

UNIVERSITET I OSLO

- Bachelor in mathematics, and informatics

2000 - 2005

UNIVERSIDAD AUTONOMA DE MADRID

- MSc in Mathematics

PROFILE

Applied AI developer with 8+ years of software development experience and one year shipping a production RAG platform. Hands-on with an orchestrator and CrewAI agents, LLM APIs, Python services, and React interfaces, including an earlier conversation application using ChatGPT and Google Speech Recognition.

Focused on delivering end-to-end applied AI solutions — from document analysis and agent workflows to user-facing tools and cloud deployments. Self-directed and collaborative, with a track record of turning complex business requirements into maintainable production systems.

WORK EXPERIENCE

Estudio Tributario Canarias

2025 - PRESENT

Full stack AI Developer - Freelance

- Implementation of a two-service RAG platform with an Orchestrator and CrewAI-based agents.
- Integration of AI-powered document analysis, rule extraction, and scenario summaries.
- Development of an agentic planning and pricing interface for legal automations using React, TypeScript, and FastAPI.
- Integration of WordPress with the RAG agent system and consolidation of two Joomla websites.
- Development of the production Pricing Wizard SaaS platform using Python, Node.js, FastAPI, React, TypeScript, and Tailwind CSS.
- Development of responsive frontend applications using React, TypeScript, and Material UI.
- Implementation of role-based admin and customer portals with Supabase authentication.
- Development of an Express.js and PostgreSQL API for pricing rules, scenarios, and integrations.
- Deployment and testing using Docker, Kubernetes, GCP, Railway, Netlify, and Playwright.

- 162/300 ECTS completed

Sopra Steria Norway
2022 - 2024

Senior Software Engineer

- Development of a live conversation application for a Pepper robot in Python.
- Integration with ChatGPT and Google Speech Recognition.
- Analysis of existing ITSM processes and integrations to design effective replacement solutions.
- Design, development, and testing of tailored ServiceNow applications across ITSM, CSM, and FSM.
- Automation of manual processes using Flow Designer, Integration Hub, and JavaScript.
- Implementation of REST integrations between ServiceNow, Azure AD, and other external systems.
- Development of user interfaces, Service Portal widgets, and ServiceNow mobile applications.
- Automated testing, technical documentation, customer demonstrations, training, and ongoing support.

Posten Norway
2019 - 2021

System developer

- Collaborate with Digdir and other partners to build new functionalities for the interface.
- Shaping the team strategy and OKRs, as well as participation in workshops for product development.
- Development of the front-end with Javascript, React and Redux as the main technologies.
- Development of backend systems in Java and .NET, extending existing APIs.
- Writing automated tests both on the front and backend.
- Reduction of technical debt by re-writing outdated parts of the code.
- Using collaboration tools like Miro, Figma, Slack and GitHub.
- Experience with Azure Cosmos DB, Jupyter Notebooks, Kibana and Grafana for monitoring.
- Third line support.

S5 Consulting 2018

SAP and Neptune consultant

- Development of internal applications and projects on the SAP Cloud platform.
- Integrate between the backend systems and the SAP Cloud platform.
- Development of applications on Neptune's Planet 9 platform.
- Building applications to demonstrate the capabilities of Disruptive Technologies IoT products.
- Exploration of new technologies and execution of proof of concept projects.

Diggit Norge 2017

Frontend developer

- Build an e-learning platform, where I collaborated interdisciplinary with the product and design teams.
- Front End development with React and Redux as the main technologies used.
- Integrating with the .NET REST API.
